Yes, we perform voiceovers in a number of languages including Korean and Russian. Please let us know how long are the scripts, in how many session you would like to have them recorded and whether you require a male or female voiceover artist.

Each script is about 1,000 words divided into 4 sections. How much would you charge and how long would it take to record? I would need a male voice.

In regards to our previous experience, it would take about 2-4 hours to record each script, plus 1-1.5 hour for editing. We would need about 3-5 days to complete the recording. Please email us the script for our review and we'll get back to you with a quote.
